BUSINESS MANAGEMENT & ANALYSIS

Data-driven and analytical master's student at Columbia University with a strong foundation in business analytics and data-driven decision-making. Seeking a challenging role that allows me to leverage my skills in data analysis, project management, and process improvement to deliver actionable insights and drive business success. Proven ability to collaborate across teams and improve business processes using data-driven strategies.

KEY COMPETENCIES

Data Analysis & Visualization	Process Improvement & Optimization	Strong interpersonal skills
SQL & Python Proficiency	Data-Driven Decision Making	Proactive and self-motivated
Business Intelligence Tools	Cross-Functional Team Collaboration	Exceptional organisational skills

PROFESSIONAL EXPERIENCE

Capgemini   **June 2023 - August 2023**
Assistant Consultant

- Collaborated on a transformative project for a leading global life sciences and pharmaceutical company.
- Conducted data analysis and optimized processes in production, operations, import/export, licensing, and warehouse management to meet client requirements.
- Implemented robotics process automation and big data insights to modernize the supply chain data analysis system to improve logistics efficiency for strategic expansion in the Chinese market.

RELATED EXPERIENCE

Syracuse University: Capstone Project   **September 2022 - December 2022**
Team Leader

- Led the creation and development of a comprehensive business plan as part of undergraduate Capstone experiences at Whitman School of Management.
- Demonstrated proficiency in addressing various dimensions of management education, including finance and business analytics.
- Developed entrepreneurial skills, adapting to market challenges, and presented business plans to professionals, showcasing investor-focused presentations.
